Meet Suthar

Full Stack Engineer

meetsuthar412@gmail.com 9316588687 Mehsana,GJ

Summary

Full Stack Engineer with **4+ years of freelance experience** building production-ready web applications, AI-powered products, and scalable backend systems across the full software development lifecycle. Experienced in **React, Next.js, TypeScript, Node.js, Python, FastAPI, PostgreSQL, AWS, REST APIs, and modern cloud architectures**, with a strong focus on Applied AI and agent infrastructure.
Hands-on experience building **LLM applications using OpenAI and Anthropic, LangGraph, LangChain, RAG, prompt engineering, multi-step agentic tooling, AI evaluations, workflow automation, and human-in-the-loop testing**. Skilled at translating product requirements into reliable end-to-end solutions across frontend, backend, databases, APIs, AI workflows, testing, deployment, and observability.

Work Experience

Full Stack Engineer, *Independent Freelance Consultant | Remote* 01/2022 – Present

- Architected and delivered **full-stack web applications using Next.js, React, TypeScript, Node.js, Python, FastAPI, and PostgreSQL**, reducing feature delivery time by approximately **30%** through reusable components and modular API architecture.
- Built production-ready **RAG and agentic AI workflows using OpenAI, Anthropic, LangChain, LangGraph, Pinecone, and embeddings**, enabling users to retrieve grounded answers and automate multi-step business workflows.
- Developed **multi-step AI agents with tool calling, structured outputs, workflow state management, and human-in-the-loop checkpoints**, improving task completion reliability and reducing manual workflow effort by approximately **40%**.
- Implemented **AI evaluation pipelines using offline benchmarking, precision-focused evaluations, prompt test suites, and hallucination checks**, improving response quality and creating repeatable regression testing for LLM-powered features.

WEB DEVELOPER, *Independent Freelance Consultant | Remote* 01/2022 – Present

- Developed and launched **responsive web applications with React, Next.js, TypeScript, JavaScript, Tailwind CSS, Node.js, and REST APIs**, improving application performance and reducing page load times by approximately **25%**.
- Designed and integrated **RESTful APIs, PostgreSQL databases, authentication systems, and third-party services**, supporting end-to-end product functionality across frontend, backend, and data layers.
- Built reusable UI components and responsive layouts that reduced duplicated frontend development effort by approximately **35%** while maintaining consistent UX across desktop and mobile experiences.
- Automated testing and deployment workflows using **Git, GitHub Actions, Docker, Jest/PyTest, and AWS**, reducing manual deployment effort by approximately **50%** and improving release consistency.

Education

Bachelor of Engineering, *Ganpat University* 2019 – 2022
Computer Science

Skills

- **Applied AI & Agent Infrastructure:** LLMs (OpenAI, Anthropic), LangGraph, LangChain, RAG, Prompt Engineering, Embeddings, Vector Databases, Tool Calling, Multi-Step Agentic Workflows
- **AI Evals & Workflow Automation:** Eval-Driven Development, Offline Benchmarking, Precision Evals, Human-in-the-Loop Testing, Hallucination Reduction, YAML Semantic Views, AI Regression Testing, Workflow Automation
- **Frontend Development:** React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend Development:** Python, FastAPI, Node.js, Express.js, REST APIs, GraphQL, Microservices, Authentication, Webhooks
- **Databases & Data:** PostgreSQL, SQL, MongoDB, Redis, Pinecone, Vector Databases, Data Modeling, Query Optimization
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Linux, Cloud Deployment
- **Testing & Engineering:** PyTest, Jest, Unit Testing, Integration Testing, API Testing, End-to-End Testing, Git, GitHub, Agile/Scrum
- **AI Developer Tools:** ChatGPT, Claude, GitHub Copilot, Cursor, OpenAI APIs, Anthropic APIs

Projects

AI Customer Support & Workflow Automation Platform,
React | Next.js | TypeScript | Node.js | Python | FastAPI | OpenAI | Anthropic | LangChain | PostgreSQL | Redis
- Developed an AI-powered customer support platform that combines **LLM responses, knowledge retrieval, conversation context, and automated business actions** in a single workflow.
- Implemented **multi-step agentic tooling** allowing AI agents to call APIs, retrieve customer information, create structured actions, and escalate complex cases to human operators.
- Introduced **human-in-the-loop testing and approval workflows**, reducing incorrect automated actions by approximately **35%** while preserving human control over high-impact operations.
- Built analytics dashboards to track response quality, workflow completion, escalation rates, and AI evaluation metrics across production conversations.

Full Stack SaaS Operations Platform,
Next.js | React | TypeScript | Node.js | Python | FastAPI | PostgreSQL | AWS | Docker | Redis
- Built an end-to-end SaaS application with **role-based authentication, dashboards, CRUD workflows, reporting, notifications, and REST APIs**, supporting scalable business operations.
- Designed PostgreSQL schemas and optimized SQL queries to reduce average API response time by approximately **30%** for data-intensive workflows.
- Developed reusable React and Next.js components that accelerated new feature development by approximately **35%** across multiple product modules.
- Containerized services with **Docker** and deployed cloud infrastructure on **AWS**, implementing CI/CD workflows for repeatable testing and production releases.

AI-Social-Assistance-main, *Python, FastAPI, React, OpenAI, LangChain, RAG, PostgreSQL, Vector Database, REST APIs*
- Built an **AI-powered social assistance platform** that uses LLM-based conversational workflows to understand user requests, generate contextual responses, and provide personalized assistance.
- Implemented **RAG pipelines with LangChain, embeddings, and vector search** to ground AI responses in relevant knowledge and reduce unsupported or hallucinated responses.
- Developed **FastAPI REST services and React-based interfaces** for seamless communication between the AI layer, backend services, database, and user-facing application.
- Integrated **prompt engineering, structured outputs, conversation context, and workflow automation** to improve response consistency and support multi-step user interactions.

AI Document Intelligence & RAG Application,
Next.js | TypeScript | Python | FastAPI | OpenAI | Anthropic | LangChain | RAG | Pinecone | PostgreSQL
- Developed an AI document intelligence application that ingests business documents and provides **semantic search, contextual Q&A, summarization, and structured information extraction**.
- Implemented document chunking, embeddings, metadata enrichment, vector retrieval, and context assembly to create a production-oriented **RAG pipeline**.
- Added prompt templates, structured JSON outputs, citation-aware responses, and evaluation datasets to improve consistency and reduce unsupported AI responses.
- Built a responsive Next.js interface allowing users to upload documents, search knowledge bases, review AI responses, and provide feedback for **human-in-the-loop evaluation**.
